Brand DNA

OUR STORY

It all starts over a cup of coffee.
Where we get to know you and your story.
Your interests, your family, your plans for the future.

Because in an industry where profit can sometimes be prioritised above personalisation, we challenge this approach from the start.

We believe that the difference is stitched into the details.
That no two people are exactly the same, and therefore, there's no single path for wealth preservation and prosperity.

Instead, we help you craft the life you aspire to.
Invested in you. Invested, together.

Providing expertise and service for an extraordinary journey and security for your next generation.

Our heritage in the family office business has equipped us with a strong track record, generations' worth of experience, a diverse network of leaders across industries, and a focused strategy to preserve and elevate your influence and affluence.

BRAND DNA

Personal and down-to earth

Relationships often start over a cup of coffee. And talking about portfolios will often come after we've spoken about hobbies and families. For us, it's more important that clients feel a connection to our people, rather than trying to immediately sell.

We meet at eye level with our clients. Less jargon. Less high-flying words and promises. We are confidently what we are, choosing not to be the loudest in the space but instead the reliable, discreet partner. Our partners prefer when we boil it down to a simple, understandable level.

In every interaction, we prioritise the person in front of us, ensuring a human connection first. We don't grow for the sake of growth. The people we bring into our fold are just as important, which is why we aim to lead with a people focus, and not just a sales focus. At the end of the day, our people are why a prospect would choose Cape Capital over a competitor.

BRAND DNA

Treatment tailored to the individual

Whereas other banks and investment firms pride themselves on having everything for everyone, we aim to be something for someone.

As part of our smaller pool of clients and our process of acquisition, we are able to deliver a high-level of excellence in our services. With that, we also want our clients to feel like part of an exclusive club. There's nothing generic in the way we deal with clients. Instead, we carefully curate an approach to each person.

For Cape Capital clients, investments and advisory are tailored and to individual needs. Since we know our clients deeply, we are able to provide more curated treatment than what they could receive from others in the space.
